

## **HRR Director's Decree issued on 21 April 2022**

**Code: RKMZ/04/2022**

Energy saving and fire prevention measures applicable in the TBU Halls of Residence.

In accordance with the global trend of reducing energy consumption, with regard to rising energy prices, environmental protection and with the aim of minimizing the increase in charges for accommodation (rents), I have issued the following Director's Decree:

1. All residents in the TBU Halls of Residence are obliged to:
  - a) When leaving the room, turn off the lights and disconnect all electrical appliances from electrical outlets (particularly chargers disconnected from the device and computers).
  - b) When nobody is present in the common accommodation areas (kitchens, bathrooms, hallways), turn off the lights and switch off all electrical appliances except for the refrigerator.
  - c) In the event that a resident leaves the room and this room will be empty for more than one day, set the heating to a minimum.
  - d) During the heating period, ventilate the rooms and common accommodation areas for a short time and only for the time strictly necessary. It is forbidden to ventilate with a tilt open window when the heating is permanently switched on.
  - e) During the heating period, residents are not allowed to leave a window open if they leave the room.
  - f) Regularly defrost the refrigerator to prevent ice buildup around the door, which can prevent secure opening and closure of the freezer door.
  - g) Use only such own appliances which are allowable in the TBU Residence Halls and provided that the appliances comply with the Czech Technical Standard and their power consumption does not significantly exceed the power consumption usual in such appliances.
  - h) Use IT equipment only for study and educational purposes. It is strictly forbidden to:
    - use IT equipment to mine cryptocurrencies;
    - use specialized gaming computers with a power input of more than 700W to play games;
    - leave computers running unattended to perform tasks other than those related to classes and education.
  - i) Avoid wasting water.
2. Failure to observe this Director's Decree will be considered a gross violation of the Residence Halls and Housing Rules, and the accommodated person will also be charged the price for a violation of the rules in accordance with the currently valid price list entitled Charges for Damages Valid for Residents in the Halls of Residence of TBU in Zlín.

This Director's Decree comes into effect on 1 May 2022.
